

REVISION RECORD			
LTR	ECO NO:	APPROVED:	DATE:

- Notes:**
1. Use shielded cable for audio lines.
  2. Keep audio grounds isolated from each other and from all other grounds. Severe audio hum will result if grounds are improperly connected.
  3. A 0.22uF or larger capacitor is required for Icom and other radios that apply DC voltage on the audio line. C1 is not needed for Kenwood and Yaesu radios.
  4. The optional record switch allows recording with programs not supporting recording.
